THE 2016 CHRYSLER 200
DRIVE PROUD
The 2016 Chrysler 200 story turns the lens on the designer’s vision into the making of a game-changing vehicle. From concept to ownership experience, immersed in the accessibility of premium design engineering. It’s the evolution of quality and attention to detail that began with trusting our instincts the way that you trust yours. And trusting the awards and recognition these achievements have earned to become an industry and segment leader. This is what confidence in creativity looks like; it’s the epitome of purposeful design. Because you deserve to be surrounded by quality standards and performance that work as hard as you do. It’s a culmination of intuitive technology, efficiency and performance; a closer view of world-class American design.

The Chrysler 200 delivers a beautiful exterior design—a thoughtful, aggressive stance. Each model is built with the tight uniformity of an automotive ‘Best Buy,’ making it a smart, solid choice for a family sedan. Consumers Digest named the Chrysler 200 a three-year Best Buy, as it ranked highest in the Mid-size Sedan segment. The state-of-the-art, easy-to-use technology, communication and navigation keep drivers and passengers connected through the available Uconnect touchscreen system. The 200 also earned a spot on the Consumers Digest list of automotive “Best Buys,” making it a solid, smart choice for a family sedan.

DESIGNER POVs

Smooth and Quiet Ride
Athletic architecture and aerodynamic efficiency contribute to the strategically engineered quietness of the 200 cabin, thanks to honed exterior shapes, air management, a triple door-seal system, seamless roof panels and sound-reducing applications and materials.

Inspirational Takes Shape
The 2016 Chrysler 200 models share a sophisticated surface of virtually seamless curves and angles for a streamlined yet dynamic look. Each model is beautifully sculpted with character lines that work as hard as you do. It’s a culmination of intuitive technology, efficiency and performance; a closer view of world-class American design.

Inspiration Takes Shape.

The four beautifully sculpted Chrysler 200 models share a sophisticated surface of virtually seamless curves and angles for a streamlined yet aggressive stance. Each model is built with the tight uniformity of an automotive “Best Buy,” making it a smart, solid choice for a family sedan. It’s what confidence in creativity looks like; it’s the epitome of purposeful design. Because you deserve to be surrounded by quality standards and performance that work as hard as you do. Advanced Product Material and Color Development
Can you describe how the design process begins for an all-new vehicle?**

**JH:** For the all-new Chrysler 200, it actually began abstractly. As a collaboration between designers at our studio in Las Vegas and engineers at the Chrysler Technical Center in Warren, Michigan, we had the freedom to design the car from the ground up. This included developing the overall concept, the aesthetic, and the interior design.

**JH:** During the first few months, we focused on developing the overall concept of the car. We wanted to create a car that was both aerodynamic and visually appealing. We knew that the design had to be innovative and offer something new to the market.

**JH:** After several months and reviews, each designer is tasked to bring their concept to life. It's a great team-building exercise, as well, and really gets a collaboration of the best ideas — everyone pitching in, sketching, and designing.

**JH:** So, the final design selection made you both a Design Lead?

**JH:** Yes, this reveals the authors of the final exterior and interior design, which is an honor, but it's still a major team effort. We are the lucky ones responsible to oversee the project and ensure that each part of the vehicle is cohesive as a whole.

What are the stages that are instrumental at this point?

**JH:** Again, the clay artists craft a full-scale physical model from the final design. They work closely with us to help shape and contour the car down to the millimeter. We are fortunate to have such a devoted and experienced clay-modeling group. We keep these models in the design studio throughout production and beyond for inspiration and pride, as well as for design updates into future models.

**JH:** We also work closely with our designers, mechanical and electrical engineers, and the safety and quality teams. There are many stakeholders developing the new technology and features at the same time we are designing the car and sometimes what they are working on will affect the outcome of the design.

Can you give an example of how a design can be affected by engineering?

**JH:** During the interior of the new 200 it was definitely the introduction of the electronic Rotary E-Shift for the 9-speed transmission. The new electronic transmission was brought in by Chryslers Engineering and it forced us to select the driving modes. Previously, this was a complex system of cables and linkages concealed inside the console that mechanically shifted the transmission. But now, with a new transmission, the console could be designed differently to accommodate the new technology.

**JH:** What are the biggest challenges to designing an all-new vehicle?

**JH:** Well, the entire process is challenging but it’s an opportunity to make something really special. That’s the real goal here with the new 200, it’s designed and made well and thought-out. It’s an important car to so many, including manufacturers, because of the quality of every part that goes into it. We wanted to make sure that every element of the car is designed to the highest possible standard.

**JH:** The process and product development are inspirational and intuitive. We wanted this new car to really make a statement of how much progress the brand and the company have made, as well as be indicative of where we are as a brand.

**JH:** The new Chrysler 200 symbolizes the symbol of the new generation of the brand.

How do you feel about the final design now that it’s been produced?

**JH:** If I were to drive a car with a white sheet, the overall shape and proportion should be so distinctive that it’s recognizable to not only a trained design eye but also familiar with the vehicle. It’s a true testament to an iconic vehicle and it’s true of the Chrysler 200 design. This is also a statement to what was achieved from the initial concept to the final product. The fact that we have achieved our goals and vision for this car is a huge accomplishment.

**JH:** And after several months and reviews, each designer is tasked to bring their concept to life. It’s a great team-building exercise, as well, and really gets a collaboration of the best ideas — everyone pitching in, sketching, and designing.

**JH:** Basically, everyone in the studio starts designing the car. This process allows a collaboration of the best ideas — everyone pitching in, sketching, and designing.

**JH:** So, the final design selection made you both a Design Lead?

**JH:** Yes, this reveals the authors of the final exterior and interior design, which is an honor, but it’s still a major team effort. We are the lucky ones responsible to oversee the project and ensure that each part of the vehicle is cohesive as a whole.

What are the stages that are instrumental at this point?

**JH:** Again, the clay artists craft a full-scale physical model from the final design. They work closely with us to help shape and contour the car down to the millimeter. The fact that we have achieved our goals and vision for this car is a huge accomplishment.
LED Fog Lamps.
The available LED projector fog lamps are set inside bezels within the lower grille of the front fascia. The lamps are angled downward to reduce the amount of glare while at the same time illuminating the road ahead, allowing for better visibility when driving in heavy fog.

DESIGNER POV:
Signature Flair
The outside mirrors with available integrated turn signals indicate the premium detail work crafted into the 200. Orange reflective side markers are positioned forward of the front wheels, drawing attention to the front fascia’s Satin Black headlamps and upper grille texture. The distinctive light element at the bottom of the lamps highlights their shape, which is punctuated by the projector lenses in chrome accent rings.

200C SHOWN IN BILLET SILVER METALLIC
Equal Parts Purpose
DESIGNER POV: Beneath the Surface.

The Chrysler design team works closely with product suppliers and engineering to develop parts that have a state-of-the-art performance purpose while staying true to design aesthetics. Aside from the function and endurance, including gravel and impact resistance, the LED lighting element on 200 contributes to the enhanced fuel efficiency due to the reduced power needed for it to operate.

Cover more range and make fewer gas station stops with advanced gear architecture. The standard 9-speed transmission provides excellent acceleration with fast, smooth and comfortable gearshifting. The highly efficient fuel consumption, with an estimated 15 hwy kpl, is due to the optimized e-shift operation and a 14-kg weight reduction from a comparable 6-speed transmission. Each gear responds quickly during acceleration, with smooth power delivery and transitions between all nine gear ratios. A unique set of four overdrive levels helps gain efficiencies while reducing overall noise, vibration and harshness (NVH). The available Sport Mode supports the option for manual shifting capability to help maximize a dynamic performance experience.

Class-Exclusive 1 9-Speed Automatic Transmission Enhances Performance and Fuel Efficiency

The Efficiently Powered 2.4L Tigershark® MultiAir® Engine.

Standard on the 200 models is the fuel-efficient 2.4L Tigershark four-cylinder engine outputting a peak performance 184 horsepower and 234 N·m of torque. The engine is designed for reduced friction to enhance performance and fuel efficiency. Combined with the class-exclusive standard 9-speed automatic transmission, as well as the aero-enhancing design, the Tigershark engine provides a reduced EPA estimated 10 city/15 hwy kpl.

Unique sport shift schedule with gear hold while driving in paddle-shift mode; fast and firm shift engagement with top-gear disable for improved responsiveness.
Best-In-Class1 Available Horsepower Is There When You Need It and Always When You Want It

3.6L Engine — Best-In-Class1 Available with 295 Horsepower.

A Ward's Top 10 Engine selection for three years, the 3.6-liter Pentastar® DOHC V6 engine is also available on 200C models. It's one of the lightest and quietest of its kind and applies some of the most advanced automotive engine technologies available.

The performance of best-in-class1 295 horsepower and 355 N·m of torque allows 90% of its peak performance value at 1600 to 6400 rpm.
Rigorous Wind Tunnel Testing. Extensive wind testing contributes to the aerodynamic body design for smooth airflow above, below, and under the 200. Active grille shutters automatically close, redirecting airflow around, rather than into, the vehicle. Aerodynamically enhanced features like low-resistive wipers and aerodynamically shaped mirrors ensure exceptional aerodynamic performance, enhanced visibility and refined exterior appearance.

DESIGNER POV: Athletic Architecture Enhances the Dynamics. A rigid structure along with a tight fit and finish ensure insulation between the road and cabin, resulting in a reduction in wind noise as well as a solid ride and handling experience. Another significant benefit to the design of the front suspension on the 200 is a flat-bottomed geometry, which allows excellent integration with the vehicle floor pan and actually contributes to the aerodynamic performance of the vehicle.

DESIGNER POV: Shaped to Function and Flow. The muscular, sculpted hood carries distinctive character lines and flows seamlessly to the upper grille and distinctive Chrysler wing design badge. The hood shingles over the grille to visually close gaps and enable a quality appearance. The upper grille and lower intake carry ribbon-like chrome elements that flow in concert using opposite contours for geometric balance and premium appearance.

Standard-Sized or Dual-Pane Panoramic Sunroof. Sunshine and expansive overhead views ease the tension of any traffic pattern. In addition to an available standard-sized sunroof, an available dual-pane sunroof provides a glass ceiling for both rows of passengers to enjoy. One-touch power opens, closes and vents the front panel, and a power sunshade covers the tinted glass when closed.

200C SHOWN IN BRIGHT WHITE
200C SHOWN IN BILLET SILVER METALLIC

من وجهة نظر المصمم: بنية رياضية تعزز الديناميكية. البنية فائقة الصلابة ورشاقة التصميم واللمسات البديعة تعمل كلها مجتمعة على عزل الرياح، بالإضافة إلى ذلك، نظام التعليق الأمامي في كرايسلر يتميز عن التقليدية بشكل جناحي منخفض في الأمام، يتم التعالوج هذا الشكل بناءً على مساحات شفافة للنظام الأمامي. الملامح الأيروديناميكية المخصصة تساهم في تحسين الأداء الآيروديناميكي للراكب، وتحقيق تجربة قيادة أفضل، وتحكم أعلى، وأداء أكثر روعة من الخارج والداخل في سيارة كرايسلر. فتحة سقف بانورامية كبيرة جدًا، مรองع أو مزدوجة، تأتي مع النورات الشمسية المدفوعة بالرياح، وتجمع بين الأسطح العلوية الشفافة والدرّخشة البينية، لإضفاء ما يشبه الشريط البيني الأيوني الناعم والغاز، على الشكل الشفاف للش Bakan جمالية وإدراك設計.
DESIGNER POV: Stacked Deck

From the rear-quarter angle, the sculptural coupe-like appearance becomes most apparent in the silhouette where the roof blends into the rear deck lid, into a ducktail-shaped, integrated rear spoiler. A wheelbase of 108 inches contributes to interior spaciousness and outstanding dynamic agility. The sleek side windows define the upper canopy and are accented by a chrome or black surround that appears to be drawn with an artist’s brush as its physique transforms. The horizontally oriented taillamps use LED illumination to provide a uniform appearance, extended at the corners for aerodynamic efficiency and visual width. A rear, Satin Black-finished lower diffuser panel holds trapezoidal, chrome-finished exhaust tips on V6-equipped 200C models. Like the front fascia, the rear is a seamless EXPANSE that carries its equipment below the taillamps and deck lid line, including side markers positioned behind the rear wheels for an aggressive look.

200 Bold Maneuvers.

For drivers who enjoy using the manual shifting option and opening it up on the open road, the Sport Mode on 200 delivers enhanced steering and throttle feedback, stability control, transmission shifts and more aggressive performance. And for those who enjoy showing off their urban style and sport-performance attributes, this model is right up your alley. Athletic inside, outside and under the hood, the 200 stands apart in the crowd.

2015 Chrysler 200 named “Must Test Drive Vehicle” for 2015, according to Autotrader.com
Steering-Wheel Controls.
Ergonomically located control buttons on the steering wheel provide ease of operation for the available 8.4-inch Uconnect® touchscreen, as well as the audio, voice and speed controls.

Hand-on-the-Wheel Manual Shifting.
The two levers with the engraved – and + symbols are the paddle shifters used to manually control the gear selection of the 9-speed transmission. Standard on 200C with the V6 engine, the paddles are utilized in Sport Mode for full performance-driving capabilities.

Core Steering Wheel.
The available 3-spoke leather-wrapped and heated steering wheel provides ergonomic grip and layout of cruise settings and phone controls along with available Sport Mode paddle shifters. The open top portion invites clear-view access to gauges and the available 7-inch Driver Information Display (DiD). An available two-tone premium Nappa leather-wrapped, stitched and real wood, tilt/telescoping-column steering wheel with a distinctive chrome tracer ring brings a luxurious look and feel to the palms of your hands ( pictured).

Heated Steering Wheel.
The available heated steering wheel delivers a 360°-surround, single level of warmth and can be turned on or off using the Uconnect® system’s touchscreen display.
7-Inch Available Customizable Driver Information Display (DID).

The available driver-interactive full-color display in the instrument panel cluster provides configurable and incredibly crisp graphics, which are seamlessly integrated with cluster analog instruments. The distinctive blue-ambient display allows for a wide range of settings, including audio, speed, compass, temperature, fuel economy, trip, cruise control, trailer braking, vehicle status and engine performance.

Paddle-Shift Gauge Display.

When the available paddle shifters are in use, the gauge displays Sport Mode activation with active manual gear shifters. Icon displays include Shift light to indicate selected gear, maximum rpm and a DID message when an unavailable gear is selected.
A Deeper Dive
Into World Class Manufacturing at the New 2-million square foot Sterling Heights, Michigan, State-of-the-Art Assembly Plant

The Benchmark for Quality Assembly.
We believe drivers should know how their car is made and the quality our workers stand behind. With World Class Manufacturing techniques, the plant runs more efficiently, keeping costs down and allowing Chrysler to offer more features on the 200 at a lower price. It also employs the most modern and environmentally responsible waste material and clean-energy operation processes.

Gravity Sealing.
Using a rotating carrier that turns the vehicle upside down, assemblers have better access, accuracy and vision to seal underbody seams. Sealing is further enhanced as gravity takes over and pulls the sealant deeper into the seams. This innovative process adds to the vehicle’s water resistance and reduces future corrosion.

Gravity Sealing.
Using a rotating carrier that turns the vehicle upside down, assemblers have better access, accuracy and vision to seal underbody seams. Sealing is further enhanced as gravity takes over and pulls the sealant deeper into the seams. This innovative process adds to the vehicle’s water resistance and reduces future corrosion.

Best in Wear.
Seals, powder coats and paints an entire vehicle using state-of-the-art robotic systems. The enhanced clean-room environment provides outstanding paint, clear-coat and consistency applications for durability. It also uses renewable soy-based foam, instead of oil-based, to fill body cavities, saving on weight and cost.

Durable and Long-Lasting Tri-Coat Paint.
Available on 200 Limited and 200C models, this exterior paint finish utilizes a specialty tri-coat application process. It combines a base coat, independent layer of pearlescent flake or mid-coat and high-gloss clear coat. The result is a three-dimensional color appearance that delivers a deep and lasting shine.

Your Comfort and Style in Mind.

With this kind of premium comfort and seating for five, get ready to have company along for the ride. The ergonomically designed seats support contours of the body, with coverings offered in cloth, a cloth and leather combination, or available heated leather seating surfaces. The durable S-shaped spring suspension in the seat design provides even weight distribution. Multi-density foam in the lower seat, seatback and bolsters enhances comfort, while stiffer foams in the side bolsters give side-to-side occupant stability. Front seatbacks are also available with a four-way lumbar adjust for custom positioning.

Heated and Ventilated Seats Make Any Day Better.

You’ll always get the best seat with the available heated and ventilated seats. When heated, the driver and front passenger seats have two settings and may be ventilated for faster cooling. The feature can also be programmed to come on automatically with available remote start operation.

8.4-inch Touchscreen

Drive every mile connected without losing focus on the road. The Uconnect® system takes non-distracted driving very seriously, which is why the 200 has such user-friendly conveniences built to keep your eyes on the road. It features the available 8.4-inch system is the largest interactive touchscreen in its class.
Class-Exclusive Center-Console Pass-Through Storage Area.
The interior design’s Rotary E-shift allows the driver to shift operation simply by turning the console-mounted dial. This innovative application, along with the standard Electric Park Brake with SafeHold, eliminates traditional shift lever mechanics, enabling an open center console for unique conveniences and storage opportunities. The storage area is large enough to carry anything from a purse to a tablet-sized device and provides access to media ports, including a USB port, audio jack and power outlet, under the sliding cup holders.

Multi-Position Cup Holders.
The cup-holder tray can be slid to the half-open position if a single beverage container is in the forward cup-holder position. The tray makes way for additional storage beneath. The two-container cup holder is size-adjustable via rubberized gripping elements to ensure secure stowage of everything from a 12-ounce can to 1.5-liter bottle.

Multi-Position Cup Holders.
Premium Materials and Well-Thought-Out Ergonomics.
The classic and minimalist-inspired available interior uniquely blends real open-pore wood accents with bronze-finished bezel work, and delivers one of the most functional, spacious and ergonomic integrated center stack-console designs. A three-dimensional, floating bezel found on the cluster and center stack is repeated on the driver and front-passenger doors.

Backseat Convenience.
The Chrysler 200 boasts a backseat area that includes 60/40 split rear seatbacks with pass-through for flexible trunk storage. With three headrests, wide seat tracks for ample foot space, a fold-down armrest with integrated cup holders and map pockets on front seatbacks, rear passengers will always feel right at home when you share the ride.

Material وعناية بأدق تفاصيل الراحة.
توفر مقصورة كلاسيكية تجمع بين البساطة والايماء، وبين لمسات الخشب الحقيقي وفانوس الفضية، فضلاً عن كوسول الوسطي لتمائم زيادة مفحمة مغطاة. تتوفر دروب في الكوسول الوسطي لتمثال تحركها في باب السائق والراكب الأمامي.

مزايا الراحة في المقاعد الخلفية
تمكّن كرسراً 200 تراكب المساحة الخلفية من خلال تقسيمها الفعال للحجز بنسبة 60/40، بالإضافة إلى سهولة الوصول إلى حجرة الأملع مع مساند الرؤوس الثلاثة، السعة الواسعة للأقدام، ومسند ذراع قابل للطي نحو الأسفل مع حاملات الأكواب مدمجة، بالإضافة إلى بروكس لتخزين المستندات والخرائط. يشعر الركاب في الخلف دائماً براحة الشعور في منزلهم.
Safety Cage and Air Bags — Surrounded in Protection.

The body frame strategically places advanced high-strength steels where they are most needed. The result is a safety cage with outstanding occupant protection in the event of front, side or rear impact. The eight standard air bags include front dual-stage air bags with adaptive venting technology, driver and passenger knee air bags, as well as front-seat-mounted side-impact air bags which extend over front and rear seating rows. Advanced multistage low-risk deployment front air bags incorporate adaptive venting technology, which delivers varying levels of deployment based on occupant size and impact severity.
Bring Your Network with You

Remain focused on the road with your hands on the wheel, while you communicate, navigate and stay entertained. Find out more at DRIVECONNECT.COM.

Remote Door Lock/Unlock/Vehicle Start.
You can lock/unlock or remotely start your vehicle from a distance.

Climate.
